

Risk Services - Safety & Loss Control

Risk Services' colleagues bring a fresh approach to developing and maintaining a risk, health and safety management program. Whether working with an organization where there is no on-site expertise or consulting with a client's existing personnel, our all-encompassing expert staff offers unbiased, results-oriented recommendations.

Many businesses employ our Risk Services colleagues instead of increasing the duties of current management personnel or hiring a full-time Health and/or Safety Manager to develop an organization specific safety program that is easily administered as well as highly effective. Risk Services colleagues can perform this function at less cost and with greater effectiveness.

A well-designed program identifies areas of opportunity for improvement and resolves workplace issues cost-effectively. Risk Services addresses the following areas:

SAFETY MANAGEMENT/ACCOUNTABILITY

A growing alternative for many companies today in order to stay competitive is outsourcing non-revenue generating services. A partnership with CompManagement's Risk Services team is a viable solution to help control ever-expanding overhead expenses. Risk Services offers an extensive menu of services, designed to protect your organization and its greatest asset – your employees. A sampling of services includes:

- Integrated Outsourced Safety Department
- Safety Programs/Reviews
- Contractor Safety Requirements
- Improvement Action Plans
- Regulatory Self-Compliance
- Contingency and Disaster Planning

By implementing effective safety management processes, accident-related costs are lowered, absenteeism and turnover is reduced, and productivity and employee morale are increased. Risk Services' colleagues integrate seamlessly into existing processes and implement the most effective and economical safety management program possible.

LOSS CONTROL SERVICES

Loss control specialists identify exposure and determine realistic, cost-effective resolutions and contingency plans – making your company a lower insurance risk. A sampling of services includes:

- Full Facility Evaluations
- Loss Analysis
- Ergonomic Assessments
- Employee Training Review
- Industrial Hygiene Services
- Mock OSHA Inspections
- OSHA Abatement Assistance

- OVER -
